Operator	Use for	Example
archived:		
archived:false	Issues & Pull requests	archived:false GNOME matches issues and pull requests that contain the word "GNOME" in unarchived repositories you have access to.
archived:false	Repositories	archived:false GNOME matches repositories that are not archived and contain the word "GNOME."
archived:true	Issues & Pull requests	archived:true GNOME matches issues and pull requests that contain the word "GNOME" in archived repositories you have access to.
archived:true	Repositories	archived:true GNOME matches repositories that are archived and contain the word "GNOME."
asignee:		
assignee:USERNAME	Issues & Pull requests	assignee:vmg repo:libgit2/libgit2 matches issues and pull requests in libgit2's project libgit2 that are assigned to @vmg.
author-date:		
author-date:YYYY-MM-DD	Commits	author-date:<2016-01-01 matches commits authored before 2016-01-01.
author-email:		
author-email:EMAIL	Commits	author-email:chris@github.com matches commits authored by chris@github.com.
author-name:		
author-name:NAME	Commits	author-name:wanstrath matches commits with "wanstrath" in the author name.
author:		
author:app/USERNAME	Issues & Pull requests	author:app/robot matches issues created by the integration account named "robot."
author:USERNAME	Commits	author:defunkt matches commits authored by @defunkt.
author:USERNAME	Issues & Pull requests	cool author:gjtorikian matches issues and pull requests with the word "cool" that were created by @gjtorikian. bootstrap in:body author:mdo matches issues written by @mdo that contain the word "bootstrap" in the body.
base:		
base:BASE_BRANCH	Issues & Pull requests	base:gh-pages matches pull requests that are being merged into the gh-pages branch.
closed:		
closed:YYYY-MM-DD	Issues & Pull requests	language:swift closed:>2014-06-11 matches issues and pull requests in Swift that were closed after June 11, 2014.
comment:		
commenter:USERNAME	Issues & Pull requests	github commenter:defunkt org:github matches issues in repositories owned by GitHub, that contain the word "github," and have a comment by @defunkt.
comments:n	Issues & Pull requests	state:closed comments:>100 matches closed issues with more than 100 comments. comments:5001000 matches issues with comments ranging from 500 to 1,000.

		7
committer-date:		
committer-date:YYYY-MM-DD	Commits	committer-date:>2016-01-01 matches commits committed after 2016-01-01.
committer-email:		
committer-email:EMAIL	Commits	committer-email:chris@github.com matches commits committed by chris@github.com.
committer-name:		
committer-name:NAME	Commits	committer-name:wanstrath matches commits with "wanstrath" in the committer name.
committer:		
committer:USERNAME	Commits	committer:defunkt matches commits committed by @defunkt.
<u>created:</u>		
created:YYYY-MM-DD	Issues & Pull requests	language:c# created:<2011-01-01 state:open matches open issues that were created before 2011 in repositories written in C#.
created:YYYY-MM-DD	Repositories	webos created:<2011-01-01 matches repositories with the word "webos" that were created before 2011.
created:YYYY-MM-DD	Users	created:<2011-01-01 matches users that joined before 2011. created:>=2013-05-11 matches users that joined at or after May 11th, 2013. created:2013-03-06 location:london matches users that joined on March 6th, 2013, who list their location as London. created:2010-01-012011-01-01 john in:login matches users that joined between 2010 and 2011 with the word "john" in their username.
extension:		
extension:EXTENSION	Code	form path:cgi-bin extension:pm matches code with the word "form," under cgi-bin , with the .pm file extension.
extension:EXTENSION	Code	icon size:>200000 extension:css matches files larger than 200 KB that end in .css and have the word "icon."
filename:		
filename:FILENAME	Code	filename:linguist matches files named "linguist." filename:.vimrc commands matches .vimrcfiles with the word "commands." filename:test_helper path:test language:ruby matches Ruby files named test_helper within the test directory.
followers:		
followers:n	Users	followers:>=1000 matches users with 1,000 or more followers. sparkle followers:110 matches users with between 1 and 10 followers, with the word "sparkle" in their name.

fork:		
		github fork:only
fork:only	Codo	matches all fork repositories containing the word "github."
	Code	forks:>500 fork:only matches repositories with more than 500 forks, and only returns those that are forks.
faultianh	Repositories	github fork:only matches all fork repositories containing the word "github."
fork:only		forks:>500 fork:only matches repositories with more than 500 forks, and only returns those that are forks.
fork:true	Code	github fork:true matches all repositories containing the word "github," including forks.
iork.uue	Code	android language:java fork:true matches code with the word "android" that's written in Java, in both forks and regular repositories.
fork:true	Repositories	android language:java fork:true matches code with the word "android" that's written in Java, in both forks and regular repositories.
fork:true	Repositories	github fork:true matches all repositories containing the word "github," including forks.
		forks:5 matches repositories with only five forks.
forks:n	Repositories	forks:>=205 matches repositories with at least 205 forks. forks:<90 matches repositories with fewer than 90 forks.
		forks:1020 matches repositories with 10 to 20 forks.
good-first-issues:		
good-first-issues:>n	Repositories	good-first-issues:>2 javascript matches repositories with more than two issues labeled good-first-issue and that contain the word "javascript."
hash:		
hash:HASH	Commits	hash:124a9a0ee1d8f1e15e833aff432fbb3b02632105 matches commits with the hash 124a9a0ee1d8f1e15e833aff432fbb3b02632105.
head:		
head:HEAD_BRANCH	Issues & Pull requests	head:change is:closed is:unmerged matches pull requests opened from branch names containing the word "change" that are closed.
help-wanted-issues:		
help-wanted-issues:>n	Repositories	help-wanted-issues:>4 react matches repositories with more than four issues labeled help-wanted and that contain the word "React."
in:		
in:body	Issues & Pull requests	data in:body closed:<2012-10-01 matches issues and pull requests with the word "data" in the body that were closed before October 2012.
in:body	Issues & Pull requests	error in:title,body matches issues with "error" in their title or body.

in:body	Wikis	installation in:body matches wiki pages with the word "installation" in their main body text.
in:comments	Issues & Pull requests	shipit in:comments matches issues mentioning "shipit" in their comments.
in:description	Repositories	jquery in:name,description matches repositories with "jquery" in their name or description.
in:email	Users	data in:email matches users with the word "data" in their email.
in:file	Code	octocat in:file matches code where "octocat" appears in the file contents.
in:fullname	Users	bolton in:fullname matches users whose real name contains the word "bolton."
in:login	Users	kenya in:login matches users with the word "kenya" in their username.
in:name	Repositories	jquery in:name matches repositories with "jquery" in their name.
		octocat in:path matches code where "octocat" appears in the file path.
in:path	Code	octocat in:file,path matches code where "octocat" appears in the file contents or the file path.
	Repositories	jquery in:readme matches repositories mentioning "jquery" in their README file.
in:readme		octocat in:readme matches repositories mentioning ""octocat"" in their README file.
in:title	Issues & Pull requests	fast in:title language:ruby merged:>=2014-05-01 matches pull requests in Ruby with the word "fast" in the title that were merged after May 2014.
in:title	Issues & Pull requests	warning in:title matches issues with "warning" in their title.
in:title	Wikis	usage in:title matches wiki page titles with the word "usage."
involves:		
involves:USERNAME	Issues & Pull requests	involves:defunkt involves:jlord matches issues either @defunkt or @jlord are involved in. NOT bootstrap in:body involves:mdo matches issues @mdo is involved in that do not contain the word "bootstrap" in the body.
is:		
is:closed	Issues & Pull requests	android is:closed matches closed issues and pull requests with the word "android."
is:curated	Topics	is:curated javascript matches topics that are curated and contain the word "javascript."
is:draft	Issues & Pull requests	is:draft matches draft pull requests.
is:featured	Topics	is:featured javascript matches topics that are featured on https://github.com/topics/ and contain the word "javascript."
is:issue	Issues & Pull requests	is:issue label:bug is:closed matches closed issues with the label "bug."
is:locked	Issues & Pull requests	code of conduct is:locked is:issue archived:false matches issues or pull requests with the words "code of conduct" that have a locked conversation in a repository that is not archived.

is:merged	Issues & Pull requests	bugfix is:pr is:merged matches merged pull requests with the word "bugfix."
is:not-curated	Topics	is:not-curated javascript matches topics that don't have extra information, such as a description or logo, and contain the word "javascript."
is:not-featured	Topics	is:not-featured javascript matches topics that aren't featured on https://github.com/topics/and contain the word "javascript."
is:open	Issues & Pull requests	performance is:open is:issue matches open issues with the word "performance."
is:pr	Issues & Pull requests	event is:pr matches pull requests with the word "event."
is:private	Commits	is:private matches private commits
is:private	Issues & Pull requests	is:private cupcake matches issues and pull requests that contain the word "cupcake" in private repositories you have access to.
is:private	Repositories	is:private pages matches private repositories you have access to and that contain the word "pages."
is:public	Commits	is:public matches public commits.
is:public	Issues & Pull requests	is:public matches issues and pull requests in all public repositories.
is:public	Repositories	is:public org:github matches repositories owned by GitHub that are public.
is:unlocked	Issues & Pull requests	code of conduct is:unlocked is:issue archived:false matches issues or pull requests with the words "code of conduct" that have an unlocked conversation in a repository that is not archived.
is:unmerged	Issues & Pull requests	error is:unmerged matches closed issues and pull requests with the word "error."
<u>label:</u>		
	Issues &	label:"help wanted" language:ruby matches issues with the label "help wanted" that are in Ruby repositories. broken in:body -label:bug label:priority
label:LABEL	Pull requests	matches issues with the word "broken" in the body, that lack the label "bug", but do have the label "priority."
		label:bug label:resolved matches issues with the labels "bug" and "resolved."
language:		
		element language:xml size:100 matches code with the word "element" that's marked as being XML and has exactly 100 bytes.
language:LANGUAGE	Code	display language:scss matches code with the word "display," that's marked as being SCSS.
		org:mozilla language:markdown matches code from all @mozilla's repositories that's marked as Markdown.
language:LANGUAGE	Issues & Pull requests	language:ruby state:open matches open issues that are in Ruby repositories.
language:LANGUAGE		rails language:javascript

Janguagest ANGLIAGE	Heave	language:javascript location:russia matches users in Russia with a majority of their repositories written in JavaScript.
language:LANGUAGE	Users	jenny language:javascript in:fullname matches users with JavaScript repositories whose full name contains the word "jenny."
license:		
license:LICENSE_KEYWORD	Repositories	license:apache-2.0 matches repositories that are licensed under Apache License 2.0.
location:		
location:LOCATION	Users	repos:1 location:iceland matches users with exactly one repository that live in Iceland.
mentions:		
mentions:USERNAME	Issues & Pull requests	resque mentions:defunkt matches issues with the word "resque" that mention @defunkt.
merge:		
merge:false	Commits	merge:false matches non-merge commits
merge:true	Commits	merge:true matches merge commits.
merged:		
merged:YYYY-MM-DD	Issues & Pull requests	language:javascript merged:<2011-01-01 matches pull requests in JavaScript repositories that were merged before 2011.
milestone:		
milestone:MILESTONE	Issues & Pull requests	milestone:"overhaul" matches issues that are in a milestone named "overhaul." milestone:"bug fix" matches issues that are in a milestone named "bug fix."
mirror:		
mirror:false	Repositories	mirror:false GNOME matches repositories that are not mirrors and contain the word "GNOME."
mirror:true	Repositories	mirror:true GNOME matches repositories that are mirrors and contain the word "GNOME."
no:		
no:assignee	Issues & Pull requests	important no:assignee language:java type:issue matches issues not associated with an assignee, containing the word "important," and in Java repositories.
no:label	Issues & Pull requests	priority no:label matches issues and pull requests with the word "priority" that also don't have any labels.
no:milestone	Issues & Pull requests	sprint no:milestone type:issue matches issues not associated with a milestone containing the word "sprint."
no:project	Issues & Pull requests	build no:project matches issues not associated with a project board, containing the word "build."
org:		
org:ORGNAME	Code	org:github extension:js matches code from GitHub that ends in .js .
org:ORGNAME	Commits	test org:github matches commit messages with the word "test" in repositories owned by @github.

orgoRGNAME Sissues & Touli Inquised in matches issues in repositories owned by the GitHub organization.
